

To the Finance, Revenue & Bonding Committee:

As a member of Bike Walk Connecticut, I support the Governor's proposals to develop and fund ...

This is good for the state, will help keep people working . As I see it is something that will make CT a better place to live much more Eco and transportation friendly. These projects will give CT an economical boost today, and a boost in our image as a state willing to spend a little for our future generations..

Thanks Wally Squier
